

Aⁱdaptive Risk Agent

Leveraging AI to build persona-based Risk Profiles, Awareness Coaching & Behaviour Monitoring

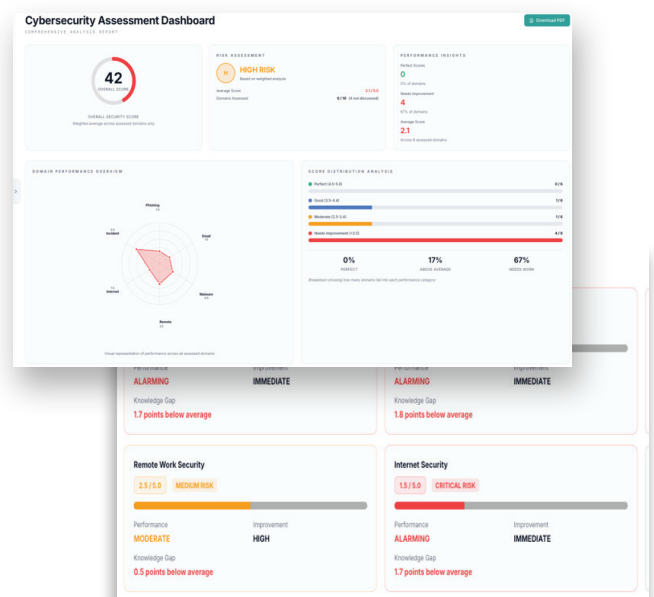

AⁱdaptiveRisk Agent is an AI Powered nucleus of the PhishRod suite that leverages artificial intelligence to assess end-user knowledge against known cyber threat vectors through interactive voice-based assessments, generating dynamic risk profiles that highlight vulnerabilities, strengths, and exposure areas.

It also delivers real-time conversational awareness coaching tailored to individual risk profiles, with the capability to also automatically assign relevant security awareness content through the Awareness LMS. A centralized dashboard combines data related to behavioural analytics, security awareness, compliance & phishing readiness providing cybersecurity teams the visibility on security readiness and threat-based insights at the organisational, departmental, and individual user levels

Features

- Customizable & Multi-Lingual AI-Driven Voice Agent
- Automated scheduling for Risk Profiling Assessments
- Dual Role as Assessor & Awareness Coach
- MS Team Integration
- Delivery of Risk Profile Report to end users via email
- Immediate coaching session planning for priority threat vectors
- Multi-Channel Security Nudges & Risk Communication
- Integrated Human Risk Ecosystem

End-User Risk Profile

"I have over all positive experience with the product. Customer supports were very effective."
