

Virtual Cyber Fest

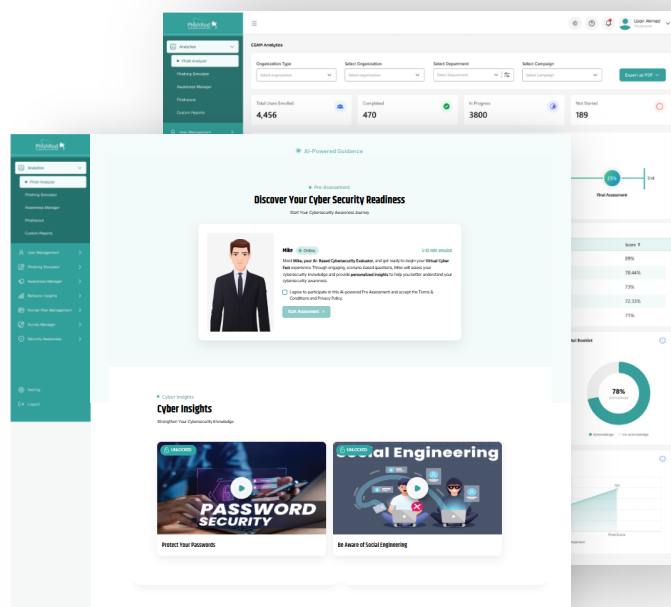

Transform Cybersecurity Awareness Month into a Measurable Digital Experience

Traditional cybersecurity awareness campaigns often rely on one time training sessions or physical events that can be difficult to scale, resource intensive to organise, and challenging to measure. Virtual Cyber Fest transforms Cybersecurity Awareness Month into a fully digital, immersive experience that enables organisations to educate, engage and assess employees through a structured awareness journey that is accessible anytime, anywhere.

Features

- End to end digital cybersecurity awareness campaign designed for organisations' distributed workforce
- Interactive learning and gamification that engages employees across the organisation
- Fully branded portal customised to reflect company identity, culture and awareness objectives
- Real time dashboards and analytics providing visibility into employee participation, progress and behavioural improvement

- AI-Driven Behavioral Risk Assessment
- Interactive Awareness Videos
- Gamified Cyber Security Challenges
- Digital Booklet on Cyber Security Awareness
- Comprehensive Cyber Impact Report with Measurable Outcomes

"PhishRod has everything we need, and helps us manage human risk and compliance."
