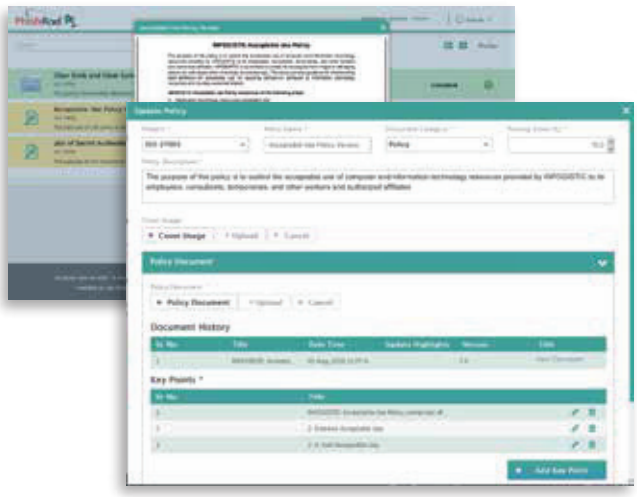
Policy Compliance Manager

Enforce Corporate Policies Using Seamless Workflow for Compliance & Consent

Compliance Manager helps organizations to assign corporate policies to end-users and keep track of compliance on an integrated & analytics-driven dashboard.

The Policy Compliance Manager is designed to simplify the compliance of corporate policies & procedures. Using an automated workflow, the corporate policies can be assigned to end users and compliance status can be measured on a powerful dashboard with correlation between phishing index, security awareness index, & policy compliance index for end users. This approach not only ensures that employees are aware of and understand the policies but also facilitates a seamless tracking mechanism to minimize human risk.



Features
