# Security Awareness Manager

Use Analytics Driven Approach To Automate Your Security Awareness Program

Security Awareness Manager automates the security awareness program for organizations. It comes with a pre-built, customizable, & multilingual content library that includes SCORM compliant training modules, posters, infographics, & screensavers. Awareness content is assigned to end users using a seamless workflow, while mapping KPIs onto a dashboard.

PhishRod also offers engaging gamified cybersecurity awareness. In addition, CyberDesk – PhishRod's AI-powered chatbot empowers end users by leveraging the power of AI and encouraging self-directed learning.
